Telegram: @MagicOfTesting

PROFESSIONAL SUMMARY

QA Engineer with 2+ years of hands-on experience testing Web and Mobile applications, with deep expertise in Web3, Blockchain, and DeFi ecosystems. Proven track record in manual and automation testing across smart contracts, crypto wallets, staking features, and tokenomics models. Skilled in building E2E automation frameworks with Playwright (JS/TS and Python), REST API testing, and network traffic analysis. Collaborative team player with a proactive approach to quality - from requirements review through to release. Actively growing toward AQA/SDET.

WORK EXPERIENCE

QA Engineer

June 2025 – Present

[iGaming](#)

- Lead manual testing across multiple iGaming products covering core gameplay, payments, and user account flows.
- Designed and maintained structured test cases and checklists to ensure consistent regression coverage.
- Conducted REST API testing to validate backend logic, data integrity, and error handling.
- Developed and maintained basic E2E automation tests using Python + Playwright, reducing repetitive manual effort.
- Applied effective test design techniques (boundary value analysis, equivalence partitioning) to maximize coverage.

QA Engineer

April 2025 – June 2025

[The ONE](#)

- Designed, maintained, and executed functional test cases and checklists for a consumer-facing product.
- Performed REST API testing (functional, negative, and edge-case scenarios) using Postman.
- Intercepted and analyzed network traffic via Proxyman and Charles to identify client-server integration issues.
- Tested Telegram bot flows including command handling, edge cases, and error state validation.

QA Engineer

August 2024 – June 2025

[Gra.Fun](#)

- Developed comprehensive test documentation for a Web3 gaming and token-launch platform.
- Performed thorough defect reporting and root-cause investigation, collaborating with devs to accelerate fixes.
- Conducted functional testing of Web application and browser extension across multiple environments.
- Tested REST API endpoints and used Proxyman to debug network requests and identify data discrepancies.

QA Engineer

April 2024 – June 2025

[DeXe DAO Studio](#)

- Built and maintained E2E automation test suite using JavaScript/TypeScript + Playwright for a Web3 DAO platform.
- Created and maintained comprehensive test documentation: test cases, checklists, and bug reports in Jira.
- Performed functional and regression testing of smart contract interactions, governance flows, and tokenomics features.
- Conducted REST API testing via Postman and Swagger; validated on-chain data consistency.
- Used Proxyman for network debugging to trace and diagnose API and blockchain node communication issues.

SKILLS

Testing	Manual Testing (Web & Mobile) · Black Box / Grey Box · Regression, Smoke, Exploratory, API Testing
Automation	Playwright (JS/TS, Python) · Cypress · Basic framework design (Page Object Model)
API & Network	REST API · Postman · Swagger · Proxyman · Charles · GraphQL (basic)
Web3 / Blockchain	Smart contract testing · DeFi flows · Crypto wallets · Staking · Browser extensions
Test Design	Test Cases · Checklists · Test Plans · Bug Reports · RTM · Boundary Value · Equivalence Partitioning
Dev Tools	Chrome DevTools · Git (basic) · SQL (basic) · HTML/CSS · JavaScript/TypeScript/Python (basic)
Process	SDLC / STLC · Agile / Scrum · Jira · Notion

EDUCATION

Technologist of Woodworking Industry

Zhytomyr Technological College at Kyiv National University of Construction and Architecture · 2015 - 2019

COURSES & CERTIFICATIONS

• ItGid - Frontend Developer (JavaScript)	2021 - 2022
• Udemy - QA Engineer	2023 - 2024
• Udemy - Python 3	2025 - 2026
• freeCodeCamp - Python	2025 - 2026
